

## About JILM

### Outline of The Japan Institute of Light Metals

#### (1) Objectives:

The Japan Institute of Light Metals (JILM) is a unique society for the scientific research activities on light metals such as aluminum, magnesium and titanium. The JILM was established in 1951 to promote the scientific and technological activities of the light metals field and to contribute to the continuous advance in the industries and has achieved variegated activities since the establishment.

#### (2) History:

- 1951 Establishment of the Research Society of Light Metals
- 1965 Reorganization of The Japan Institute of Light Metals
- 1991 40th Anniversary. International Conference on Recent Advances in Science and Engineering of Light Metals (RASELM '91)
- 1996 Corporation sanctioned by Monbu-daijin (Minister of Education, Science and Culture, Government of Japan)
- 1998 Organization of the 6th International Conference on Aluminum Alloys (ICAA6)
- 2010 Organization of the 12th International Conference on Aluminum Alloys (ICAA12)

#### (3) Current Number of Membership (Apr., 2011):

- Number of Personal Members Regular Members :1,705
- Number of Student Members: 264
- Number of Honorary Members: 49
- Number of Special Supporting Members: 6
- Number of Supporting Members: 107
- Number of Appointed Members: 90

#### (4) Headquarters:

- Address: 4-2-5 Ginza, Chuo-ku, Tokyo 104-0061, Japan
- Phone: +81-3-3538-0232
- Facsimile: +81-3-3538-0226

#### (5) Branches:

Hokkaido, Tohoku, Kanto, Hokuriku, Tokai, Kansai, Chugoku-Shikoku, Kyushu
