The Korean Institute of Metals and Materials (KIMM)

Australian Research Council Centre of Excellence for Design in Light Metals (ARC)

State Key Lab of Nonferrous Metals & Processes

National Engineering Research Center for Nonferrous Metals Composites

As a response to cope with the issues like increasing gas prices, air pollution and climate change through global warming, Asian Forum on Light Metals (AFLM) was initiated in Japan to look for answers among lightweight materials such as Al, Mg, and Ti, which soon attracted the participation of other four economies in Asia.

Following the first three AFLM respectively organized by Japan Institute of Light Metals (JILM) in 2006, Metal Industries Research and Development Centre (MIRDC) in Taiwan in 2007 and Korea Institute of Materials Science (KIMS) in 2008, this will be the fourth Forum to provide a platform for exchange of information and networks devoted to light metals.

The fourth AFLM will be held during Oct. 26-29, 2010 in Guilin, China. It is the time and place for our light metals community to meet and discuss what is influencing the R&D trend and shaping technologies and of course to start tying up activities for future.

Keynote Speakers Include:

- ▶ Dr. Kyung-mox Cho, President, Korea Institute of Materials Science, Research Activities on Light Metals in Korea
- ▶ Prof. George Collins, CAST Cooperative Research Centre/The University of Queensland, Australian Light Metals - Research and Applications
- ▶ Dr. Chin-Hai Kao, President, S-Tech Corp., Titanium Industry in Taiwan
- ▶ Prof. Tatsuo Sato, Tokyo Institute of Technology, Latest Trend of Aluminum Production Technologies in Japan
- ▶ Dr. Baiqing Xiong, Vice President, General Research Institute for Nonferrous Metals, Light Metals Industry and Technology Progresses in China

Oct. 28, 2010

13:30 Depart from Shangri-La Hotel

14:00-15:30 ELEphant Trunk Hill

Elephant Trunk Hill, also known as Elephant Hill, is located at the confluence of the Li River and Peach Blossom River in the south central area of Guilin City. It looks like a huge elephant stretching its trunk and drinking water, hence the name. Elephant Trunk Hill with its karst landscape is the symbol of Guilin.

16:00-17:20 Ludi Cave

Ludi (Reed Flute) Cave opened to the public in 1962 and got its name from a type of reed growing outside, which can be made into melodious flutes. Along the u-shaped route, visitors will have ample time to see the oddly shaped rocks and stone pillars. Illuminated by the colored lights, the cave looks like a dazzling underground palace. Inside the cave there are more than 70 inscriptions written in ink, which can be dated back as far as 792 AD in the Tang Dynasty (618-907). These aged inscriptions tell us that it has been an attraction in Guilin since ancient times.

18:00 : Arrive at Shangri-La Hotel

English tour guide and bus accommodated

After Conference Tour

Date : 29th, Oct, 2010

08:30 Depart from Shangri-La Hotel

09:30-14:30 Cruise Li river

Li River Cruises : Cruising on the Li River is enjoyable no matter what the weather is like. During sunny days, tourists can see the inverted reflection of the hills on both sides clearly in the water. During cloudy days, the hills are surrounded by mist and tourists may feel they are cruising in a mystical paradise. And when the rain comes, drizzle is like a veil, which covers the hills and river, and tourists may feel the poetic connotations of this too.

12:00 Buffet on board

16:00-17:00 Yinzi (Silver) Cave

18:00-19:00 Dinner

19:00-19:30 Move to Theatre

19:40-20:50 Impression on Liu Sanjie Show

Impression on Liu Sanjie show The performance, with the natural mountains and water as the setting, has become a must for visitors to Yangshuo, a tourist attraction in Guangxi Zhuang Autonomous Region. It is directed by famous movie director Zhang Yimou and is performed by local villagers and fishermen, particularly local minority groups as Zhuang and Yao.
